

(PLEASE DO NOT ALTER THE FONT/LAYOUT SETTINGS)

English Template for *Gengo Kenkyu*:

Subtitle, subtitle, and subtitle

(The author's name should not appear in the file)

Keywords: language, linguistics, general linguistics, grammar, meaning (Up to five)

(The body text begins here)

1. Style

1.1. On the template

This is an English-language template for Microsoft Word based on the style guide of *Gengo Kenkyu*.

It is requested to use this template when preparing a manuscript to be submitted to the journal.

This template is supposed to be used without modification to the present layout settings such as margins, font size, and line spacing. For the details see section 1.3 below.

Manuscripts in any format other than Microsoft Word should follow this template.

(Insert a blank line between sections)

1.2. How to use the template

This template uses Microsoft Word's systematic Styles feature. The built-in styles (Ribbon > Home > Styles) cover most of the fundamental elements of a linguistic manuscript such as section headings, minimizing the need for ad-hoc text styling. For example, the Strong style gives **bold sans-serif** font. Note that this does not rule out individual font styling by way of the Font feature.

Similarly, the styles labeled as Headings 1–5 give automatically numbered section titles (1, 1.1, 1.1.1, ...). This makes the structure of the manuscript readable for the dynamic outline features of

16 Microsoft Word such as Outline View and Cross-reference. Note again that this is not meant to
17 discourage the authors from numbering section titles manually.

18

19 **1.3. Length and font size**

20 This template is intended to conform to the style guide, which states that the word count of a
21 manuscript in the Roman alphabet should be around 350 words per page. The template's layout settings
22 such as font size and character/line spacing should not be modified either in the body text or in the
23 references/abstracts/notes.

24 According to the style guide, the maximum number of pages is the following: 40 pages for a
25 research paper, 15 pages for forum, 20 pages for a review article, 10 pages for a book review. These
26 page counts include all figures, tables, references, abstracts, and notes.

27 The text in the Roman alphabet should be in Times New Roman, 11 points. Smaller fonts should
28 not be used in any part of the manuscript.

29

30 **1.4. Notes and citations**

31 **1.4.1. Notes**

32 Notes should appear at the end of the text.¹ To put a note using Microsoft Word's built-in endnote
33 feature, select Ribbon > References > Insert Endnote.² It is also possible to insert subscripted note
34 numbers and endnote texts manually.³

35

36 **1.4.2. Citations**

37 All the materials mentioned in the manuscript should be listed in the bibliography. The reference

38 list should not include any uncited material. Citations should be made in the body text whenever
 39 possible; avoid putting a note only for the purpose of citation.

40 See the style guide for the format of the references; as examples, this template cites Sakuma (1941)
 41 and Postal (1970) as journal articles, Kindaichi (1955) and Kiparsky (1968) as articles in collections,
 42 Bickel et al. (2015) and LSJ (2017) as online resources, respectively.

43

44 **1.5. Linguistic examples**

45 See the style guide for the formatting of linguistic examples. Although this template includes a
 46 built-in style for numbered examples, it may not be very helpful because it does not provide any
 47 automatic styling.

48 The following glossed examples follow Leipzig Glossing Rules (Bickel et al. 2015). Abbreviations
 49 in the glosses should be defined separately, typically in a note⁴ or after the body text.

50 (Insert a blank line before and after examples)

51 (1) Tarō=wa kotosi ronbun=o san-bon kai-ta.

52 Taro=TOP this.year article=ACC three-NQ write-PST

53 ‘Taro wrote three papers this year.’

54 (2) a. Diné bi-zaad yá’át’éeéh.

55 man 3POSS-word be.good:3SG

56 ‘The Navajo language is good.’

57 b. Bilagáana bi-zaad ałdó’ yá’át’éeéh.

58 white.man 3POSS-word algo be.good:3SG

59 ‘English is also a good language.’

60

(Goossen 1995: 5)

61

62 The style guide also provides a guideline on the romanization of non-Roman alphabet languages.

63

64 1.6. Tables and figures

65 The original A4-size manuscript will eventually be reduced to the size of 115 mm (width) x 185

66 mm (height). Tables and figures in the draft will therefore be shrunk accordingly; make sure that tables

67 and figures remain readable in the printed version.

68

69 1.6.1. Example of a table

70 Tables should be numbered; the caption should be placed above the table.

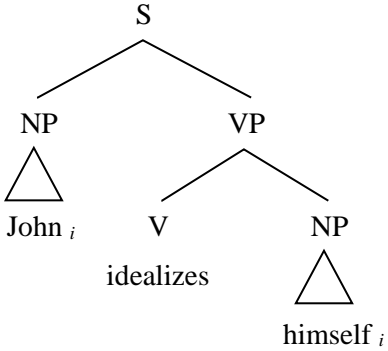

71 Table 1 Example of a table (modified from Goossen 1995: 4)

<i>nishłı</i>	‘I am’	<i>niidlı</i>	‘we two are’	<i>daniilı</i>	‘we three are’
<i>nılı</i>	‘you are’	<i>nohlı</i>	‘you two are’	<i>danohlı</i>	‘you three are’
<i>nilı</i>	‘he/she/it is’	<i>nilı</i>	‘they two are’	<i>danilı</i>	‘they three are’

72

73 1.6.2. Example of a figure

74 Figures should be numbered; the caption should be placed below the figure.

75 Figure 1 Example of a figure

76 Images should have a resolution suitable for printing.

590 **Abstract**

591 Abstracts in Japanese and English should be added at the end of the file regardless of the language
592 of the body text. The abstracts should not be more than 400 characters (Japanese) or 20 lines (English)
593 long.

594

595 **要旨**

596 本文の言語にかかわらず、末尾に日本語と英語の要旨をつけます。日本語要旨は 400 字以
597 内、英語要旨は 20 行以内である必要があります。

598 **Notes**

¹ In the published version, the notes will be set as footnotes instead of endnotes.

² Notes made by way of the Insert Endnote feature appear here.

³ This template has Endnote Reference (GK) style for superscripted note numbers.

⁴ E.g., 3 = third person; ACC = accusative; NQ = numeral quantifier; POSS = possessor; PST = past; SG = singular; TOP = topic marker.
